(a) Hayward h, $B = 3 \times 10^{-3}$
σ_v
v
$U = 0.3$
$U = 0.6$
$U = 1.0$
$U = 1.2$
$-\kappa_-(m_f)$
(b) approach to the pole $\psi = 1/\ell^2$
$1 - \ell^2\psi$ on $U \simeq 1$
v
$B = 0.0003$
$B = 0.003$
$B = 0.03$
(c) bounded h ($m = 1.5$, $\alpha = 1$)
σ_v
v
$B = 0.0003$, $U = 1.0$
$B = 0.0003$, $U = 0.3$
$B = 0.003$, $U = 1.0$
$B = 0.003$, $U = 0.3$
(d) flux against the linear kernel of Paper G
$\phi_v/\phi_v^{\text{kernel}} - 1$ on $U \simeq 1$
v
$B = 0.0003$
$B = 0.003$
$B = 0.03$
